

TANUJA MADDI

Security Analyst

madditanujareddy@gmail.com | +91 8639561152 | Hyderabad,Telangana

SUMMARY

Security Analyst with SOC specialization, experienced in incident monitoring, threat detection, vulnerability assessment, and cloud security operations. Skilled in SIEM (Splunk, ELK), IDS/IPS (Snort, Zeek), endpoint monitoring (Sysmon, EDR), and SOAR automation. Strong foundation in risk management, compliance frameworks (ISO 27001, GDPR, PDPB), and incident response workflows. Certified by IBM, Microsoft, Google, and Forage, with hands-on projects in threat intelligence integration, network hunting, and cloud security monitoring.

SKILLS

Core Security Analysis

- Risk Assessment & Vulnerability Management
- Compliance Frameworks: ISO 27001, GDPR, PDPB
- Incident Documentation & Escalation Reporting
- Threat Intelligence Integration & Malware Analysis

SOC Operations

- SIEM: Splunk, ELK
- IDS/IPS: Snort, Zeek
- Endpoint Monitoring: Sysmon, EDR
- SOAR Playbooks & Automation
- Incident Response & Containment Procedures

Cloud Security & Infrastructure

- AWS: EC2, S3, RDS, Route 53, CloudFront, CloudWatch, CloudFormation
- Microsoft Azure Security Labs
- Server Setup: Nginx/Apache, SSL, Firewalls, Docker, CI/CD Pipelines
- Cloud Threat Detection & Misconfiguration Analysis

Technical & Programming

- Python, SQL, Bash, PowerShell
- Secure Scripting & Automation
- GitHub Reporting & Documentation
- Markdown/HTML Conversion for Security Artifacts

EDUCATION

Bachelor of Computer Applications (BCA)

Jan 2023– April 2026

Osmania University, Hyderabad

- Final CGPA: 9.2

PROJECTS

Threat Intelligence Integration (MISP)

- Merged threat feeds with SIEM alerts to strengthen detection workflows.
- Automated correlation of indicators of compromise (IOCs) for faster incident triage.

Endpoint Detection & Persistence Monitoring (Sysmon + Splunk)

- Configured Sysmon to capture persistence techniques and mapped events to MITRE ATT&CK.
- Built Splunk queries to detect suspicious registry changes and scheduled tasks.

Network Threat Hunting (Zeek IDS)

- Deployed Zeek IDS to monitor network traffic and identify anomalies.
- Authored custom detection rules to flag malicious patterns and lateral movement.

Cloud Security Monitoring (AWS/Azure)

- Deployed and secured EC2, S3, and RDS instances; configured CloudWatch alerts.
- Detected misconfigurations and simulated lateral movement in cloud environments.

Incident Response Simulation

- Orchestrated containment and escalation procedures in SOC workflows.
- Documented incident playbooks with clear escalation paths and reporting artifacts.

Vulnerability Assessment & Penetration Testing (Nmap, Metasploit, Wireshark)

- Conducted scans to identify open ports, misconfigurations, and exploitable services.
- Validated findings with exploit frameworks and remediation steps.

CERTIFICATIONS & VIRTUAL EXPERIENCES

- IBM SkillsBuild – Cybersecurity, AI, Cloud
- Microsoft Learn – Azure, Security Fundamentals
- Google Digital Garage – Cybersecurity Basics, Data, Career Skills
- Forage Virtual Experience Programs
 - JPMorgan Chase – Cybersecurity Virtual Experience
 - Mastercard – Cybersecurity Job Simulation
 - PwC – Cybersecurity Consulting Simulation

EXPERIENCE

Cybersecurity Intern – Security Analyst (Applied Labs & SOC Projects)

- Monitored and analyzed security events using Splunk SIEM and Sysmon logs, detecting persistence techniques and mapping to MITRE ATT&CK.
- Carried out network threat hunting with Zeek IDS, authoring custom detection rules to identify anomalies and lateral movement.
- Integration of MISP threat intelligence feeds with SIEM alerts to improve detection workflows.
- Led incident response simulations, documenting containment, escalation, and reporting procedures.
- Deployed and secured AWS/Azure cloud environments (EC2, S3, RDS, CloudWatch), detecting misconfigurations and suspicious activity.
- Configured Nginx/Apache servers with SSL, firewalls, and CI/CD pipelines for secure hosting.
- Performed vulnerability assessments and penetration testing using Nmap, Metasploit, and Burp Suite; registered findings with remediation steps.

Cybersecurity Consulting Virtual Internships and JOB SIMULATIONS – Forage

- Deloitte – Simulated SOC workflows, analyzed phishing attempts, and noted incident reports.
- Mastercard – Investigated security alerts, applied risk assessment, and recommended mitigation strategies.
- TATA – Conducted compliance reviews, prepared client-facing security documentation, and advised on governance frameworks.
